## Contents

# Abstract

- 0.1 Objective
- 0.2 Chapter's structure

#### Introduction

- 1.1 Motivation, context and target application
- 1.2 Supporting parallelism in C/C++
- 1.3 The OpenMP standard
- 1.4 Clang as LLVM frontend

# Design

- 2.1 The framework
- 2.2 A simple example
- 2.3 Analysis
- 2.3.1 Code
- 2.3.2 Parallelism
- 2.4 Intrumentation for profiling
- 2.5 Profiling
- 2.6 Schedule generation
- 2.7 Instrumentation for the execution
- 2.8 Run-time support

# Implementation

- 3.1 Scheduling XML schema
- 3.2 Instrumentation for Profiling
- 3.3 Profiling implementation
- 3.4 Schedule generating tool
- 3.5 Instrumentation for the execution
- 3.6 Run-time support

#### Performance evaluation

- 4.1 A computer vision application
- 4.2 Results with statistics

# Conclusions

- 5.1 Achieved results
- 5.2 Future development
